*The Therapeutic Spiral International
presents*

The Neurobiology of Trauma

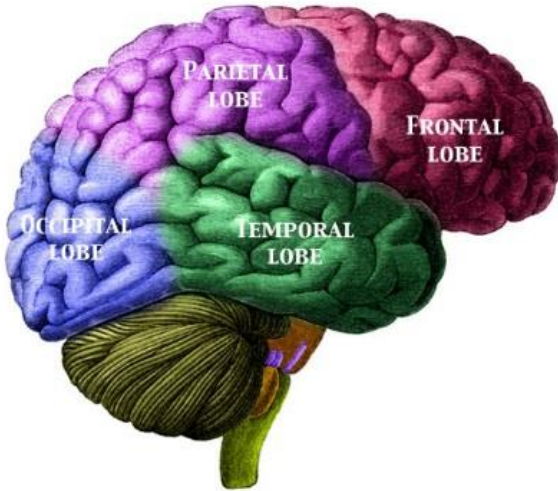

Led by:

Linda Ciotola, M.Ed., TEP

&

Steven Durost, Ph.D., LCMHC, REAT

and The Therapeutic Spiral Action Healing Team

People who have experienced traumatic events can have significant changes in the neurobiology of their brain. Participants will learn to use the Body Double (BD) intervention to heal 'rhythmic ruptures' the energetic body suffers due to traumatic events. The brain's response to trauma, along with attachment structures, are taught through action demonstrations for deeper comprehension. Live supervised practices will ensure the methods learned can be used immediately following the workshop. This workshop expands the knowledge and repertoire of students and practitioners of EMDR, EFT, sensory motor integration, as well as drama therapy and psychodrama.

Not as familiar with experiential methods, *Therapeutic Spiral Model™*, or trauma and its effects on brain, body, and relationships as you would like to be? Need CEUs? Check out the online educational series, ACTS, which covers all these topics (<http://ac-ts.com/>).

To read more about Linda visit her website: <http://healing-bridges.com> or contact her at linda.healingbridges@gmail.com 401-827-8324.
